

Micro:bit Practical Worksheet

Name: _____	School: _____	Date: _____
-------------	---------------	-------------

Use the micro:bit programs you built during the training to complete the activities below. Where asked, make a prediction before taking the actual measurement.

DAY 1 — Explore Your Micro:bit

1. Name Badge

Use the LED display to show your name or initials.

Now display a short message for another teacher to read.

What message did you display? _____

2. Shake — Random Number

Shake your micro:bit five times and record the random number shown each time.

Shake 1	Shake 2	Shake 3	Shake 4	Shake 5

Highest number: _____ Lowest number: _____

Compare with another teacher. Did you get any of the same numbers? Yes / No

3. Temperature Investigation

Before measuring: Which location do you think will be the warmest? _____

Location	Temperature
Inside the lecture room	
Outside in the courtyard	
Inside the boardroom	

Was your prediction correct? Yes / No

Which location was the coolest? _____

4. Light Investigation

Before measuring: Which location do you think will have the highest light value? _____

Location	Light value
Inside the lecture room	
Outside in the courtyard	
Inside the boardroom	

Cover the front of the micro:bit with your hand. Light value: _____

Find the brightest place nearby. Location: _____ Value: _____

Find the darkest place nearby. Location: _____ Value: _____

5. Compass Investigation

Direction / Task	Compass heading
Face the front of the lecture room	
Face the back of the lecture room	
Use the micro:bit to find North	
Turn approximately 90° from North	

6. Clap — Sound Detection

Clap near the micro:bit. Did the picture appear? Yes / No

Move a few steps away and clap again. Did the picture appear? Yes / No

Try tapping the desk instead of clapping. Did the picture appear? Yes / No

What did you notice?

DAY 2 — Step Counter

7. Step Counter Challenge

Reset your step counter to 0 before each activity.

Route	Prediction	Measured steps
Back of the room → front of the room		
Back of the room → boardroom		

8. Step Counter Challenge 2 – Repeatability Test

Walk the same route from the back to the front of the room three times. Reset the counter each time.

Attempt 1	Attempt 2	Attempt 3

Were all three results exactly the same? Yes / No

Why do you think the results may be different?

9. Micro:bit Explorer Challenge

☐ Brightest location: _____ Light value: _____

☐ Darkest location: _____ Light value: _____

☐ Warmest location: _____ Temperature: _____

☐ Coolest location: _____ Temperature: _____

☐ Compass heading of the main entrance: _____

☐ Number of steps from the lecture room to the boardroom: _____

10. Reflection

Which micro:bit feature did you find most useful or interesting? Why?

Think of one activity where you could use a micro:bit with learners in your classroom.
